

# Press articles in their original layout with **PDF Clipper**

The original layout of a media item is often very important – how large was the image, what was the effect of the headline, how compact was an important article?

With the PMG PDF Clipper, you can now extract individual items from a wide range of German newspapers and magazines in their original layout. These extracts are saved in PDF format and can be integrated in your press review.

The PDF Clipper provides you with press articles in their original layout without the need for laborious scanning. To assess the prominence of an item on the relevant page, full page thumbnails are available, which show the exact editorial environment in which the selected article appeared.

The PDF Clipper is available to you free of charge as part of the PMG Professional tariff.

In tariffs PMG Basic and PMG Comfort the PDF Clipper is available for an additional fee.
